

Subject: Your OGO® Origin Installation Template

Thank you very much for your interest in our OGO® Origin composting toilet!

We know that the space required for a toilet is an important factor when deciding on a model, and that simply measuring with a tape measure doesn't always provide the full picture.

That's why we developed our installation template. It shows you how the toilet can be integrated into your bathroom and helps determine if it will fit. You can print the template onto four standard sheets of paper, tape them together, and, if desired, transfer it onto sturdy cardboard. At the bottom edge, you will find information regarding the grid spacing.

Once you have selected a page, please choose the following menu settings under 'Options' in the print preview:

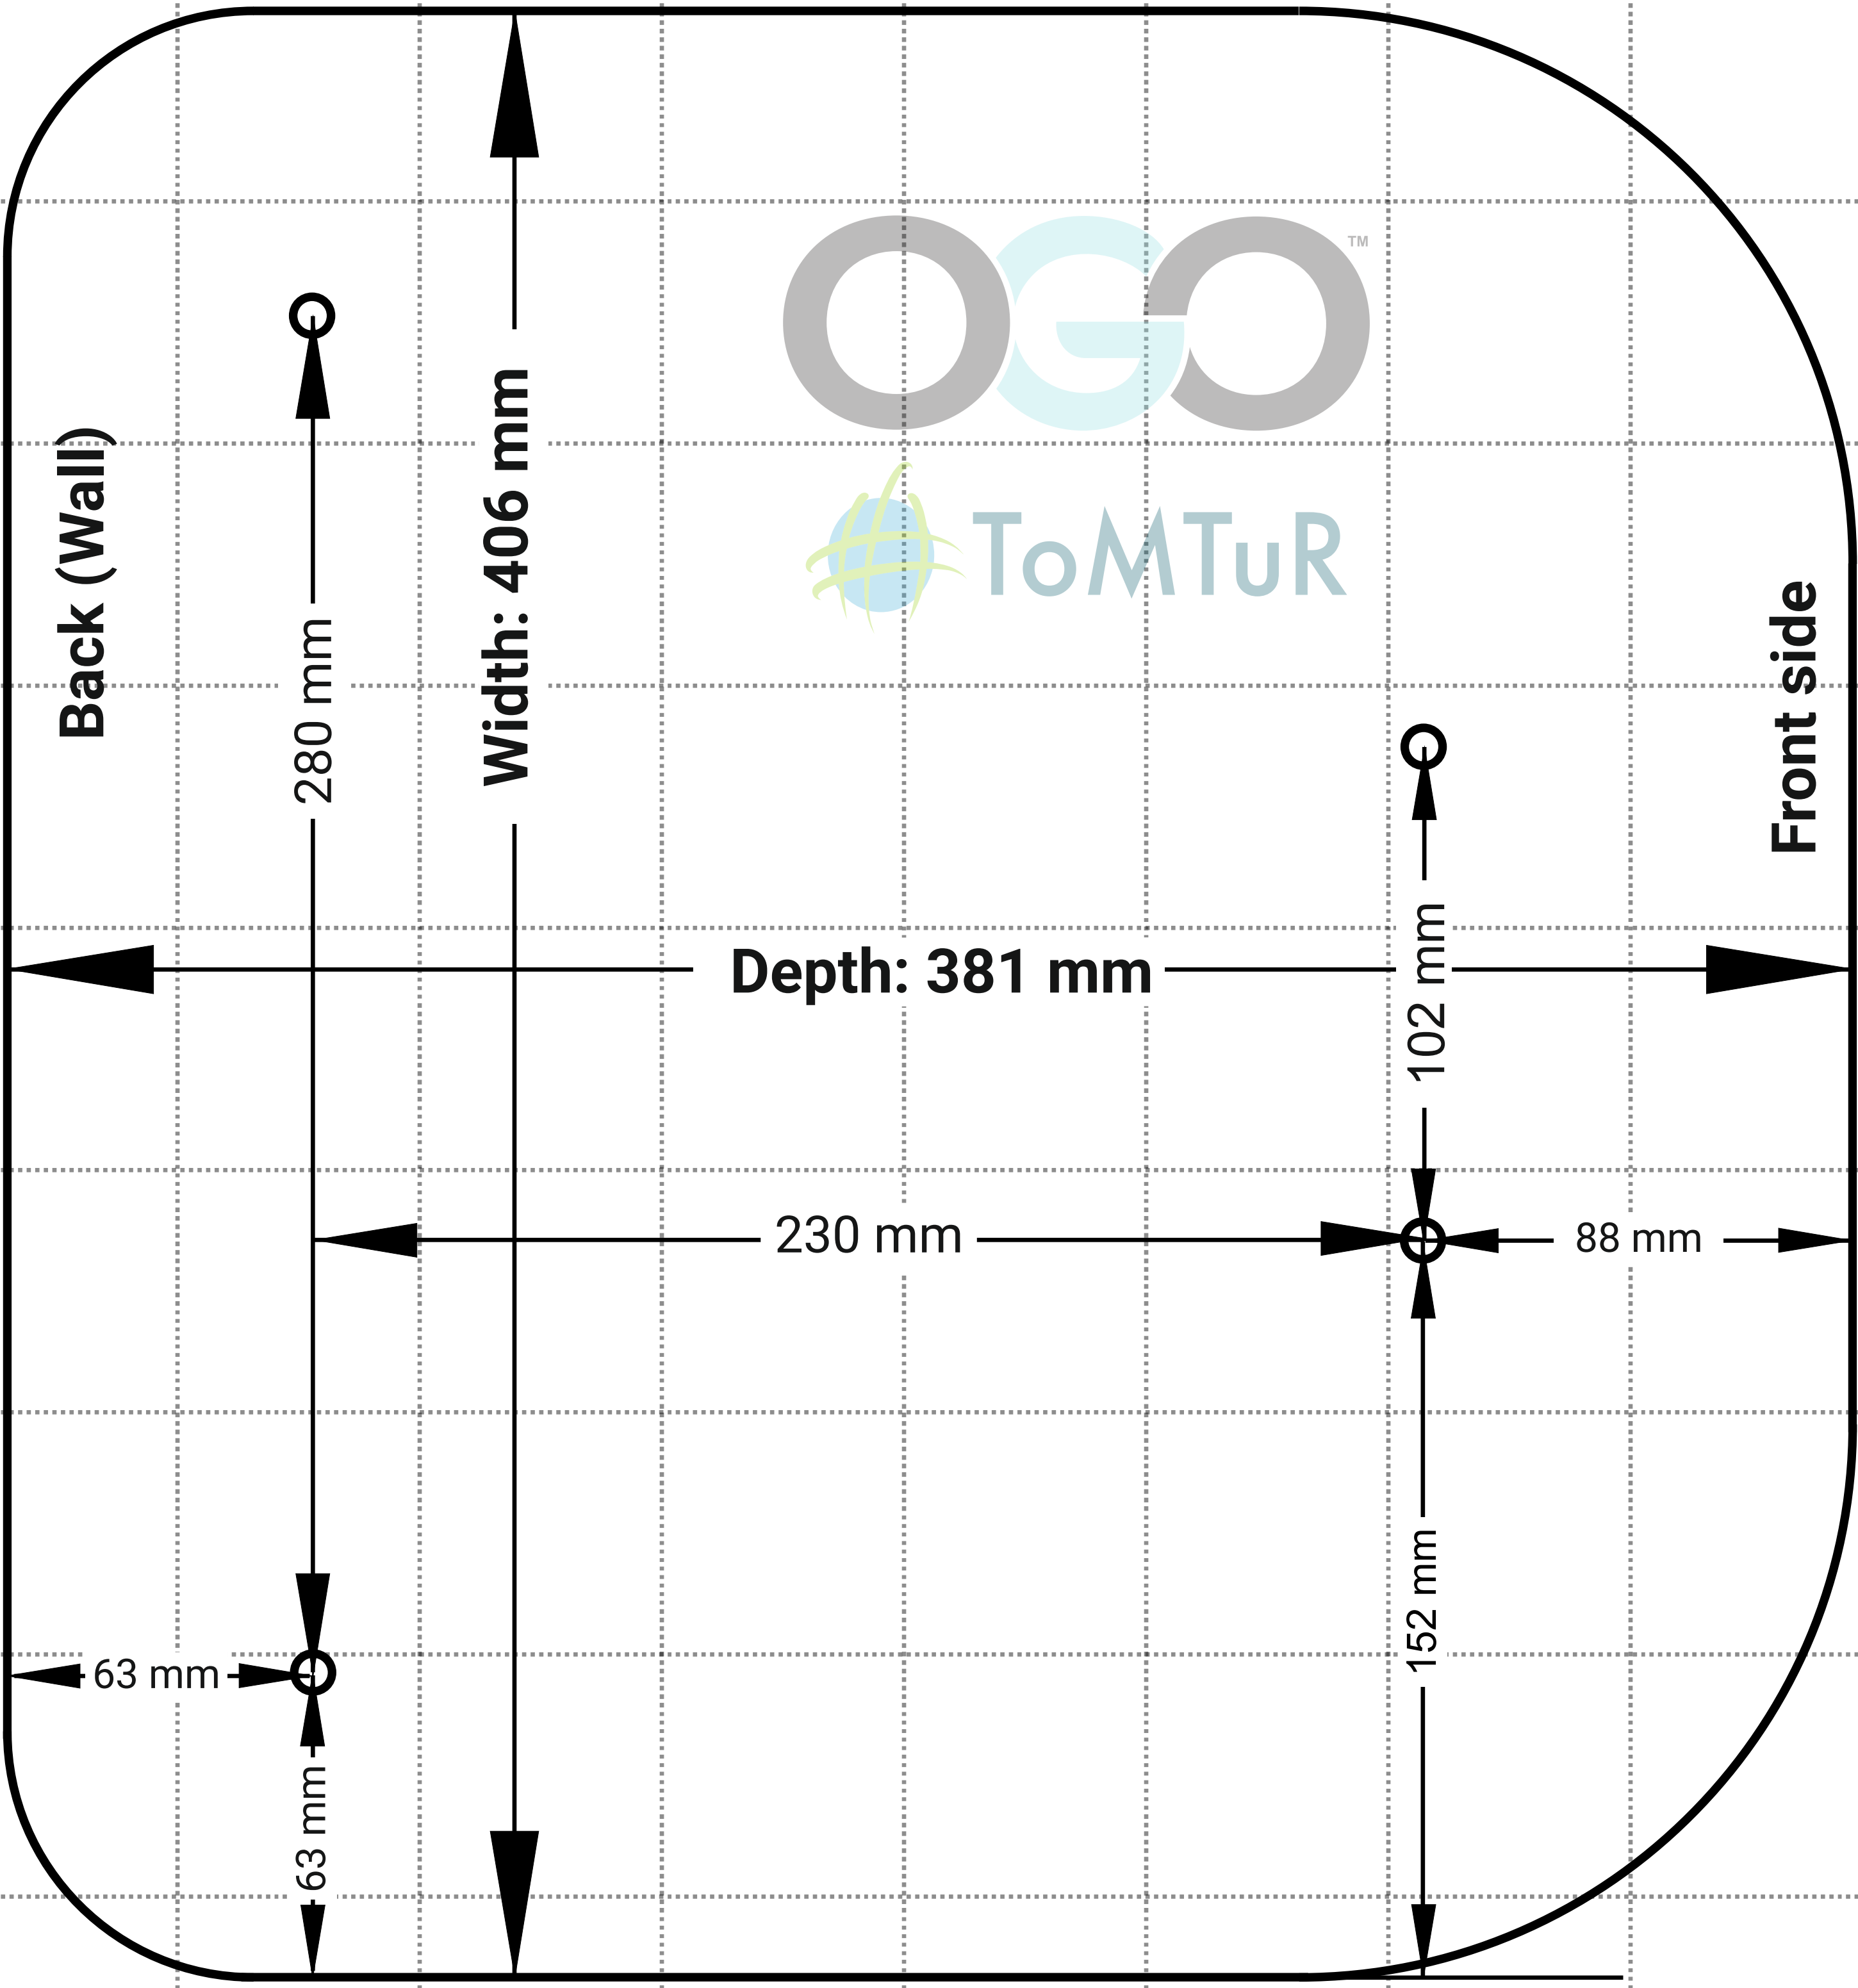

Note: Every printer has different margin settings. After taping the four pages together, please double-check the dimensions.

Placement Note: The OGO® composting toilet can be placed directly against the wall with no clearance required.

You can find more information about the dimensions on our website:
